AECOM joint venture awarded US\$72-million contract for King Khaled International Airport expansion project

LOS ANGELES (March 11, 2013) — AECOM Technology Corporation (NYSE: ACM), a leading provider of professional technical and management support services for public and private clients in more than 140 countries around the world, announced today that a joint venture in which it participates was awarded a five-year, US\$72-million contract for the redevelopment and expansion of King Khaled International Airport (KKIA) in Riyadh, Saudi Arabia, to meet a future capacity of 30 million passengers annually.

AECOM will provide program support as well as project and construction management services, including administration, project planning, design management, construction management, information and data management, public relations and communications, financial management, contract management, operational readiness and airport transfer coordination services.

"We are delighted to play an integral part in the expansion of the King Khaled International Airport," said AECOM Chairman and Chief Executive Officer John M. Dionisio. "Participating in this visionary project is a major achievement for AECOM, reflecting the continued advancement of our innovative aviation and construction services in the Middle East."

The KKIA passenger terminals will be designed to handle an increase in capacity, with AECOM providing a new processing facility; new domestic, international and swing-capability concourses; terminal renovations; new aprons; temporary elements to maintain a high level of service during the construction stages; as well as upgrading and expanding the main load center with the associated utility connections.

The project is part of a program led by the country's General Authority of Civil Aviation to redevelop KKIA into a modern commercial airport designed to industry-leading standards.

About AECOM

AECOM is a global provider of professional technical and management support services to a broad range of markets, including transportation, facilities, environmental, energy, water and government.
