AECOM awarded contract to design Gordie Howe International Bridge

Through Bridging North America consortium, AECOM to design longest cable-stayed bridge in North America

LOS ANGELES, (July 12, 2018) — AECOM (NYSE: ACM), a premier, fully integrated global infrastructure firm, announced today that it has been selected, as part of the Bridging North America consortium, to design the Gordie Howe International Bridge by the Windsor-Detroit Bridge Authority (WDBA). The project is being funded through a public-private partnership and will connect Windsor, Ontario to Detroit, Michigan. The value of AECOM's initial phase of the contract will be included in the Company's backlog for the fourth quarter of fiscal year 2018.

"We are honored to have been selected as the designer for this iconic piece of infrastructure, and for the trust WDBA has placed in AECOM and our Bridging North America partners," said Michael S. Burke, AECOM's chairman and chief executive officer. "Bridges connect, and not only will this project provide a major gateway between Canada and the United States, it will support economic growth through job creation, tourism and trade. AECOM's diverse capabilities and design expertise are a good fit in delivering the world's most technically complex and transformative infrastructure projects, and our selection by the WDBA underscores the strengths of the company we have built."

AECOM will be responsible for designing the six-lane, 2.5 kilometer-long cable-stay bridge with North America's longest 853-metre main span. The firm will also design a Canadian and a United States (U.S.) port of entry, and the Michigan Interchange, which includes road improvements and connecting ramps to the U.S. port of entry and I-75.

"AECOM has delivered some of the most complex, innovative and challenging bridge structures around the world, but this project is about so much more than the infrastructure," said Steve Morriss, president of AECOM's Design Consulting Services group in the Americas. "AECOM's vast, global network of architects, planners, engineers, safety specialists, roadway experts, landscapers, interior designers, and dozens of other technical practices will collaborate across borders to bring this symbolic project to life--connecting and serving the local communities, regions and the world."

Bridging North America's prime team members include AECOM and seven other companies which bring significant experience carrying out major infrastructure projects in both Canada and the U.S.

About AECOM

AECOM (NYSE: ACM) is built to deliver a better world. We design, build, finance and operate infrastructure assets for governments, businesses and organizations in more than 150 countries. As a fully integrated firm, we connect knowledge and experience across our global network of experts to help clients solve their most complex challenges. From high-performance buildings and infrastructure, to resilient communities and environments, to stable and secure nations, our work is transformative, differentiated and vital. A *Fortune 500* firm, AECOM had revenue of approximately \$18.2 billion during fiscal year 2017. See how we deliver what others can only imagine at aecom.com and [@AECOM](https://twitter.com/AECOM).

Forward-Looking Statements: All statements in this press release other than statements of historical fact are "forward-looking statements" for purposes of federal and state securities laws, including the future project terms, backlog and financial and economic impact of the Gordie Howe International Bridge contract as well as other future business conditions. Actual results could differ materially from those projected or assumed in any of our forward-looking statements. Important risk factors that could cause actual results to differ materially from our forward-looking statements are set forth in AECOM's periodic report on Form 10-Q for the quarter ended March 31, 2018, and other reports filed with the U.S. Securities and Exchange Commission. AECOM does not intend, and undertakes no obligation, to update any forward-looking statements.
