

AECOM wins design-services contract for Hong Kong metro rail network expansion

February 25, 2010 at 7:02 AM EST

LOS ANGELES, Feb 25, 2010 (BUSINESS WIRE) -- AECOM Technology Corporation (NYSE: ACM), a leading provider of professional technical and management support services for government and commercial clients around the world, announced today that it has won a design-services contract from MTR Corporation Limited, the owner-operator of the Hong Kong MTR metro system, as part of the Hong Kong Shatin to Central Link rail project.

AECOM's work under the contract will include designs for a new interchange station called "Diamond Hill," a semi-underground train-stabling facility, the upgrade of an existing rail depot and an extensive footbridge network.

"We are proud to play a key role in the design of Hong Kong's rapidly expanding rail infrastructure," said John M. Dionisio, AECOM president and chief executive officer. "AECOM has now played a major role in the planning of five of the six major rail projects to be built in Hong Kong during the next eight years."

Once complete, Diamond Hill is expected to become one of the busiest interchange stations in the city, accommodating nearly 47,000 people daily during the peak hour of the morning commute.

The Shatin to Central Link project will provide a new rail link between Hong Kong's New Territories and its central business district. It will pass through the heart of Hong Kong's densely populated Kowloon region as well as the former Kai Tak Airport, which is undergoing a major revitalization as a mixed-use development. The Diamond Hill station will be on the link's East West Corridor, which will join two already-operational railways to form a 34-mile metro rail line.

About AECOM

AECOM (NYSE: ACM) is a global provider of professional technical and management support services to a broad range of markets, including transportation, facilities, environmental, energy, water and government.
