AECOM selected to design Pure Water Silicon Valley demonstration facility

September 3, 2026 at 6:55 AM EDT

DALLAS--(BUSINESS WIRE)--Sep. 3, 2026-- AECOM (NYSE:ACM), the trusted global infrastructure leader, today announced its selection by the Santa Clara Valley Water District (Valley Water) to provide professional design services for the Pure Water Silicon Valley Demonstration Facility Project in California. The project will help advance direct potable reuse (DPR) as a potential future source of locally controlled, drought-resilient drinking water for Silicon Valley.

Under the contract, AECOM will lead the design of a new DPR pilot facility and a LEED-certified and solar-ready learning center at the existing Silicon Valley Advanced Water Purification Center site. The pilot facility will be capable of producing up to 200 gallons per minute of water and will evaluate advanced treatment technologies for direct potable reuse applications. The approximately 10,000-square-foot learning center will support public education, community engagement, and workforce development focused on advanced water purification and water reuse.

"AECOM has helped utilities around the world develop innovative solutions to meet evolving water needs and build long-term resilience," said Beverley Stinson, chief executive of AECOM’s global Water business. "Drawing on our extensive experience delivering advanced water reuse and purification facilities, we are proud to partner with Valley Water on this groundbreaking effort. This project is the first-of-its-kind and represents one of the most comprehensive evaluations of DPR-advanced water treatment technologies, helping further the knowledge and regulatory understanding needed to support future water reuse programs and shape the future of DPR in the region."

AECOM's scope includes project management and coordination, pilot facility design and engineering, architecture and building engineering services for the learning center, regulatory and permitting support, public outreach assistance, quality assurance and quality control, and specialized technical services. Working alongside Kennedy Jenks and a diverse team of subconsultants, AECOM will help Valley Water evaluate treatment performance, water quality, and operational considerations to inform potential future DPR implementation.

"As communities across California continue to address water supply challenges driven by population growth and climate variability, innovative water reuse programs are becoming increasingly important," said Matt Crane, chief executive of AECOM’s U.S. West region. "Our team brings decades of experience delivering state-of-the-art water treatment facilities, as well as a more than 50-year relationship with Valley Water. We are proud to support a project that advances water reuse innovation, strengthens community understanding, and helps build a more resilient water future for Silicon Valley."

About AECOM

AECOM (NYSE: ACM) is the global infrastructure leader, committed to delivering a better world. As a trusted professional services firm powered by deep technical abilities, we solve our clients’ complex challenges in water, environment, energy, transportation and buildings. Our teams partner with public- and private-sector clients to create innovative, sustainable and resilient solutions throughout the project lifecycle – from advisory, planning, design and engineering to program and construction management. AECOM is a Fortune 500 firm that had revenue of $16.1 billion in fiscal year 2025. Learn more at aecom.com.

Forward-Looking Statements
All statements in this communication other than statements of historical fact are “forward-looking statements” for purposes of federal and state securities laws, including any statements that relate to our future revenues, expenditures and business trends; future reduction of our self-perform at-risk construction exposure; future accounting estimates; future contractual performance obligations; future conversions of backlog; future capital allocation priorities, including common stock repurchases, future trade receivables, future debt pay downs; future tax benefits and expenses, and the impact of future tax laws; future legal claims and insurance coverage; future costs savings; and other future economic and industry conditions. Although we believe that the expectations reflected in our forward-looking statements are reasonable, actual results could differ materially from those projected or assumed in any of our forward-looking statements. Important factors that could cause our actual results, performance and achievements, or industry results to differ materially from estimates or projections contained in our forward-looking statements include, but are not limited to, the following: our business is cyclical and vulnerable to economic downturns and client spending reductions; government shutdowns; changes in administration or other funding directives and circumstances that cause governmental agencies to modify, curtail or terminate our contracts; government contracts are subject to audits and adjustments of contractual terms; long-term government contracts are subject to uncertainties related to government contract appropriations; losses under fixed-price contracts; our ability to successfully and timely perform our contractual obligations and to recover claims for additional contract costs; potential liquidated damages under our contracts; limited control over operations run through our joint venture entities; liability for misconduct by our employees or consultants; changes in government laws, regulations and policies, including failure to comply with laws or regulations applicable to our business; maintaining adequate surety and financial capacity; potential high leverage and inability to service our debt and guarantees; our capital allocation strategy, including our ability to continue payment of dividends and repurchase stock; exposure to political and economic risks in different countries, including tariffs and trade policies, geopolitical events, and conflicts; inflation, currency exchange rates and interest rate fluctuations; changes in capital markets and stock market volatility; retaining and recruiting key technical and management personnel; legal claims and litigation; inadequate insurance coverage; environmental law compliance and inadequate nuclear indemnification; unexpected adjustments and cancellations related to our backlog; partners and third parties who may fail to satisfy their legal obligations; managing pension costs; AECOM Capital’s real estate development; cybersecurity issues, IT outages and data privacy; risks associated with the benefits and

costs of the sale of our Management Services and self-perform at-risk civil infrastructure, power construction and oil and gas construction businesses, including the risk that any purchase adjustments from those transactions could be unfavorable and any future proceeds owed to us as part of the transactions could be lower than we expect; risks associated with our strategic initiatives, including AI investments and potential acquisitions and divestitures; as well as other additional risks and factors that could cause actual results to differ materially from our forward-looking statements set forth in our reports filed with the Securities and Exchange Commission. Any forward-looking statements are made as of the date hereof. We do not intend, and undertake no obligation, to update any forward-looking statement.
