

AECOM to Design Bangladesh's Longest Bridge

March 4, 2009 at 7:01 AM EST

US\$16-million contract is part of US\$1.5-billion bridge project

LOS ANGELES--(BUSINESS WIRE)--Mar. 4, 2009-- AECOM Technology Corporation (NYSE: ACM), a leading provider of professional technical and management support services for government and commercial clients around the world, announced today that it has won the design work, valued at US\$16 million, for a US\$1.5-billion bridge over the Padma River in Bangladesh.

The approximately 3.43-mile river crossing will be the country's longest bridge, connecting Bangladesh's southwest region with its capital, Dhaka. The government expects the new bridge to increase the country's gross domestic product by 1.2 percent by shortening travel time to the southwest by several hours. The bridge's design will also incorporate communications infrastructure, a gas-transmission pipeline and have the ability to carry a future railway.

"AECOM is proud to be selected for this important investment in infrastructure as a way to positively impact a country's economic viability," said John M. Dionisio, AECOM president and chief executive officer. "By leveraging AECOM's global network of expertise, we fully expect this iconic transportation project to further strengthen our position as the leading long-span bridge designer in Asia."

About AECOM

AECOM (NYSE: ACM) is a global provider of professional technical and management support services to a broad range of markets, including transportation, facilities, environmental and energy. With 43,000 employees around the world, AECOM is a leader in all of the key markets that it serves.
