

AECOM Joint Venture Wins US\$82-Million Design Contract for Hong Kong High-Speed Rail Terminus

June 17, 2009 at 7:01 AM EDT

Design-services project is the world's largest underground facility of its kind

LOS ANGELES--(BUSINESS WIRE)--Jun. 17, 2009-- AECOM Technology Corporation (NYSE: ACM), a leading provider of professional technical and management support services for government and commercial clients around the world, announced today that a joint venture of which it is a part has been awarded a design-services contract worth US\$82 million for the Mass Transit Railway Corporation Limited's Hong Kong High-Speed Rail Terminus project, which will connect to the high-speed rail network in Mainland China.

The multi-level terminus, which will be the largest underground facility of its kind, will have a footprint of more than 25 acres with a topside commercial development north of the proposed West Kowloon Cultural District – between the existing Airport Railway Kowloon Station and the West Rail Austin Station.

"AECOM is proud to play a key role in the design of this important high-speed rail infrastructure project," said John M. Dionisio, AECOM president and chief executive officer. "The terminus will provide the strategic linkage from Hong Kong to the comprehensive high-speed rail network in Mainland China."

Being the southernmost terminus of China's high-speed railway network, the facility will be developed as a gateway to Mainland China, with distinctive architectural and landmark features, a user-friendly layout, and convenient interchange facilities with the urban metro network in Hong Kong.

The total project cost is estimated at US\$2 billion. AECOM's revenue from this project is expected to be approximately US\$38 million. Completion is scheduled for 2015.

About AECOM
